

Multi-Week Assignment 03

20 Points – Due Dec 8, 2017 **NO LATE DUE DATES!**

Last updated: Nov 14, 2017 8:30 AM

This assignment will give you an opportunity to compare Android development to iOS development by replicating an app developed in an earlier assignment.

1. Create a new Android project in Android Studio 3.0. Name the project `MW03_ lastName_ firstName` where *lastName* is the part of your name that OSU considers to be your last name, and *firstName* is your first name.
2. Your app should run correctly and look nice on the Pixel XL virtual device, running API 26 (Android 8.0, Oreo).
3. Replicate the operation, and the look-and-feel of weekly assignment 05.

Submitting Your Solution

- Zip your project folder into a single file, go to the course BrightSpace site, navigate to the *Dropbox* page, and submit the zip file in the folder that corresponds to this assignment.
